

Toden Industries Documentation

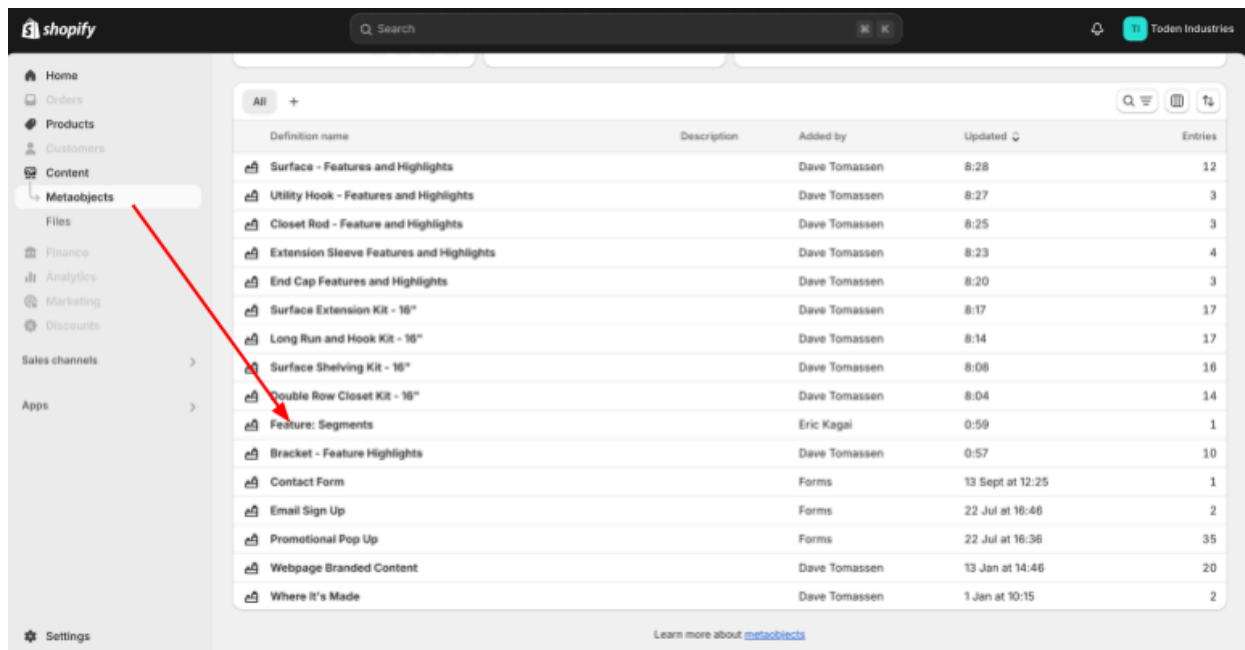

Segment Extensions and adding Segment and Entry to the Metaobject.

Segment Extensions

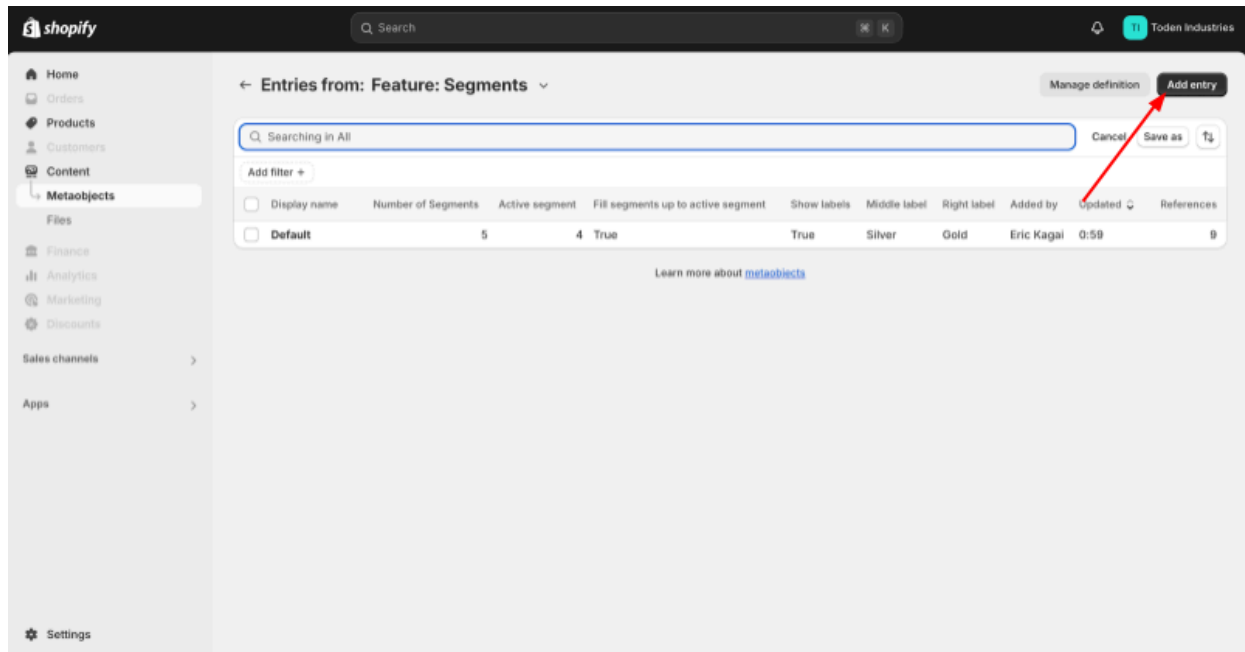

Adding a segment Entry.

Steps.

1. Log in to the store.
2. On the admin panel, navigate to **Content** and then **Metaobjects**.
3. On **Metaobjects** click **Feature: Segments**.

2. Find the **Add Entry** option within the Feature: Segments page.

3. Click on **Add Entry** and filling in the required information.

The screenshot shows the 'Add Feature: Segments' form in the Shopify Admin. The form is titled '← Add Feature: Segments'. It has several input fields and a sidebar on the right. A red arrow points to the 'Name' field. The sidebar on the right contains fields for 'Feature: Segments' (by Eric Kagai), 'Status' (Active), and 'Handle' (The entry's auto-generated identifier).

Name * Display name

Number of Segments *
Enter any number from 4 to 10

Active segment *
Enter any number between 4 and the maximum "number of segments" in the previous field

Fill segments up to active segment

☐ True
☐ False

Show labels

☐ True
☐ False
Labels will be read by screen readers when hidden.

Left label

Feature: Segments
by Eric Kagai

Status
Active

Handle
The entry's auto-generated identifier

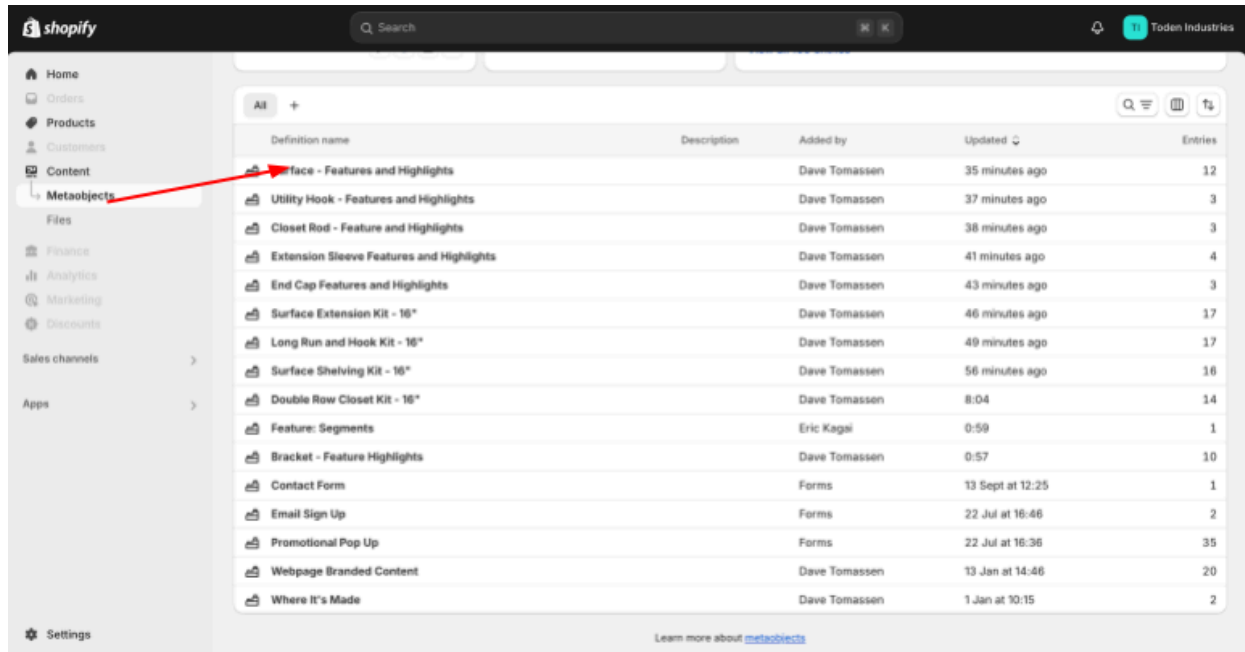

4. Then **Save** the changes.

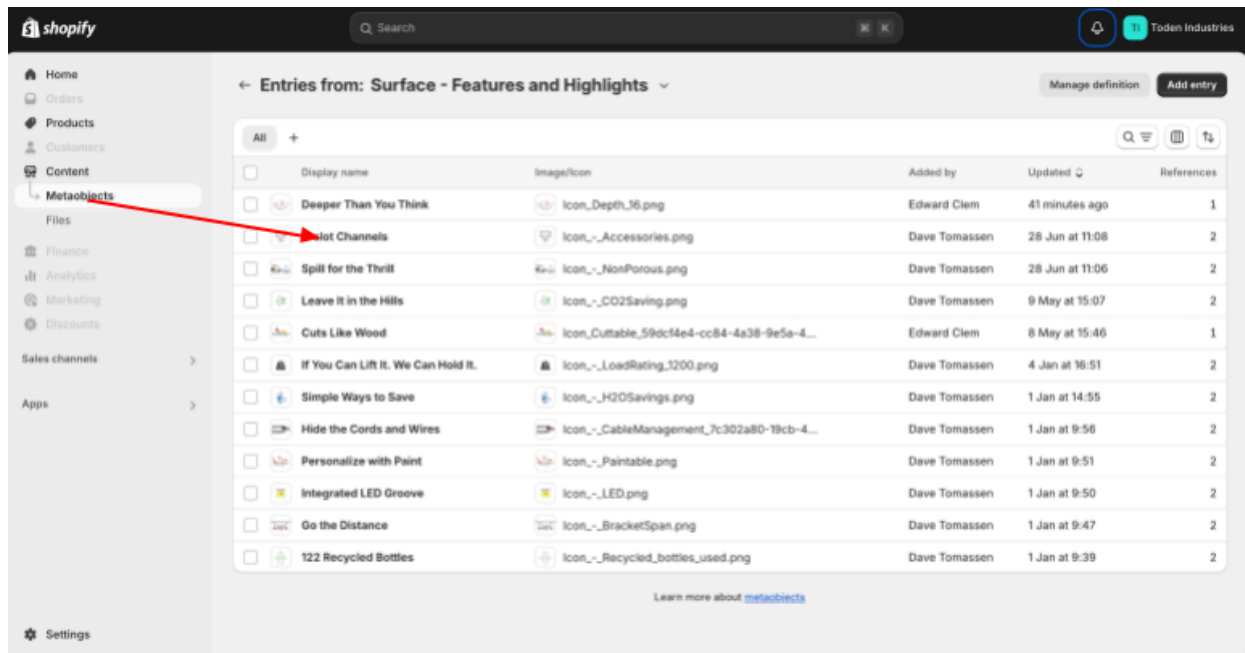

Adding Entry to the Metaobject.

Steps.

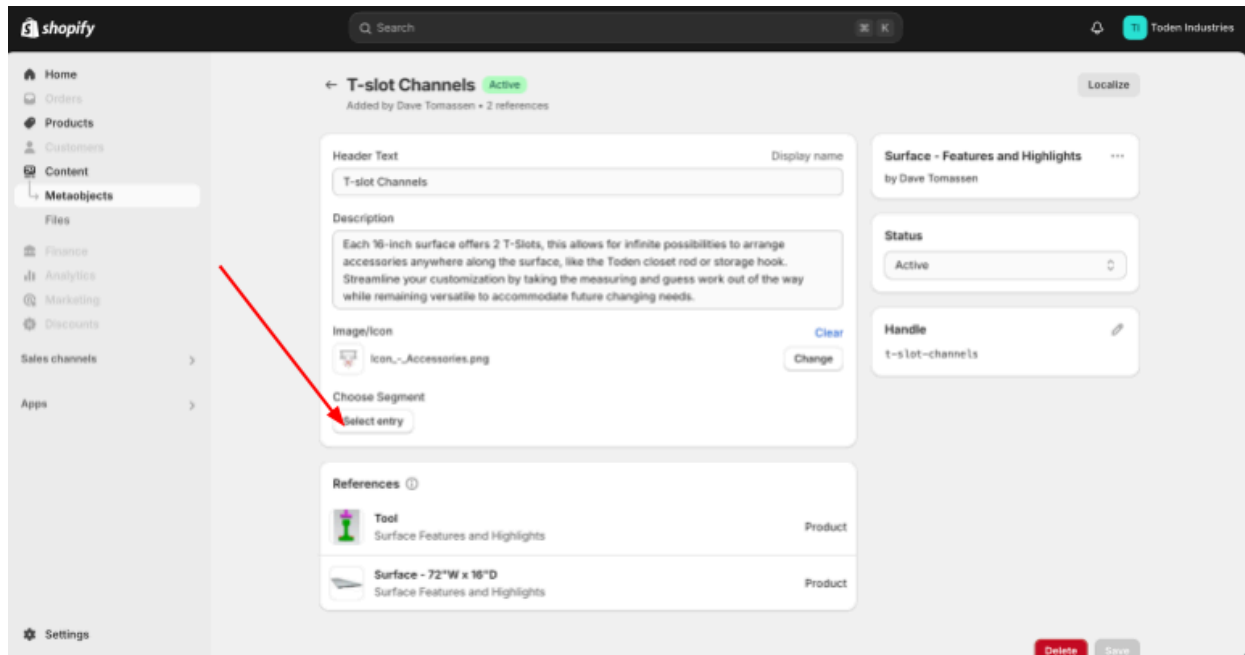

1. Log in to the store.
2. On the admin panel, navigate to **Content** and then **Metaobjects**.
3. On **Metaobjects** click any of **Metaobject Key Features Extension**.

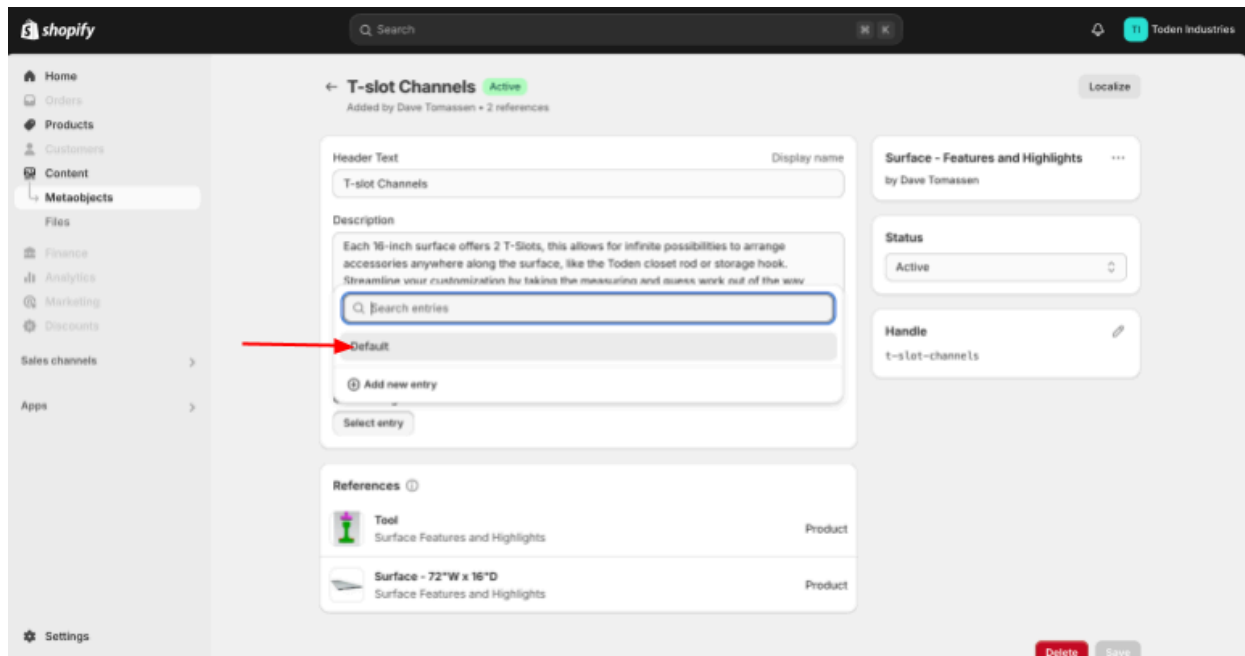

4. Locate any of the **Key Features** you want to add Entry to.

5. Click on the **selected feature** and look for the Choose Segment option to Insert **Entry**.

6. Click on **Select Entry** to choose the segment you have created.

7. Then **Save** the changes.
