# Documentation: CC Resorts

Style Filters

Product pages contain many tags, but not all of them are used for filtering. To ensure only relevant tags are displayed for filtering, you need to add the respective tags as shown in this guide.

Steps
1. Log in to the store.
2. In the admin panel, go to **Content**.
3. Click **Metaobjects** and select **Style Filters**.

4. Click **Style Filters**, then select **Add Entry**.

5. In the **Add Entry** form:

   - Enter the **Name** (this is what customers will see on the front-end).
   - Enter the **Related Tag** (this should match the product tag that you want to use for filtering).

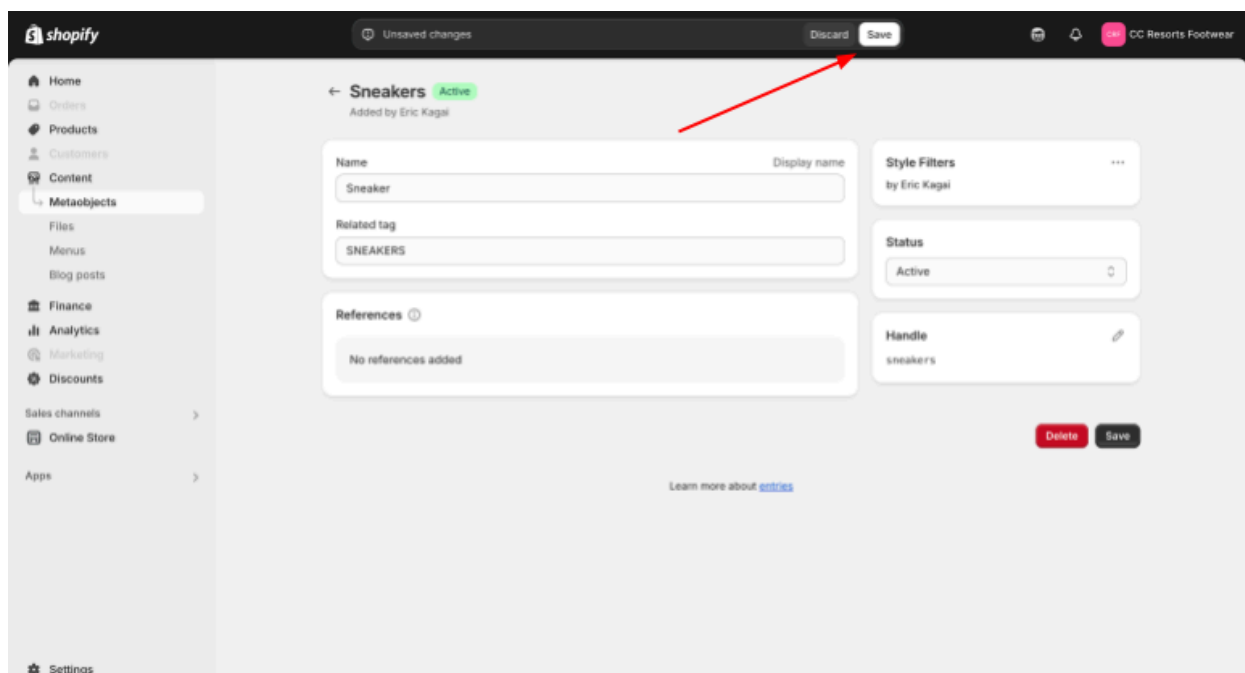

7. Assign the corresponding tag from the **Product page tags**:

- In the **admin panel**, go to **Products**.
- Locate the **Tags** section.

8. After selecting the name and related tag, click **Save** to apply the changes.
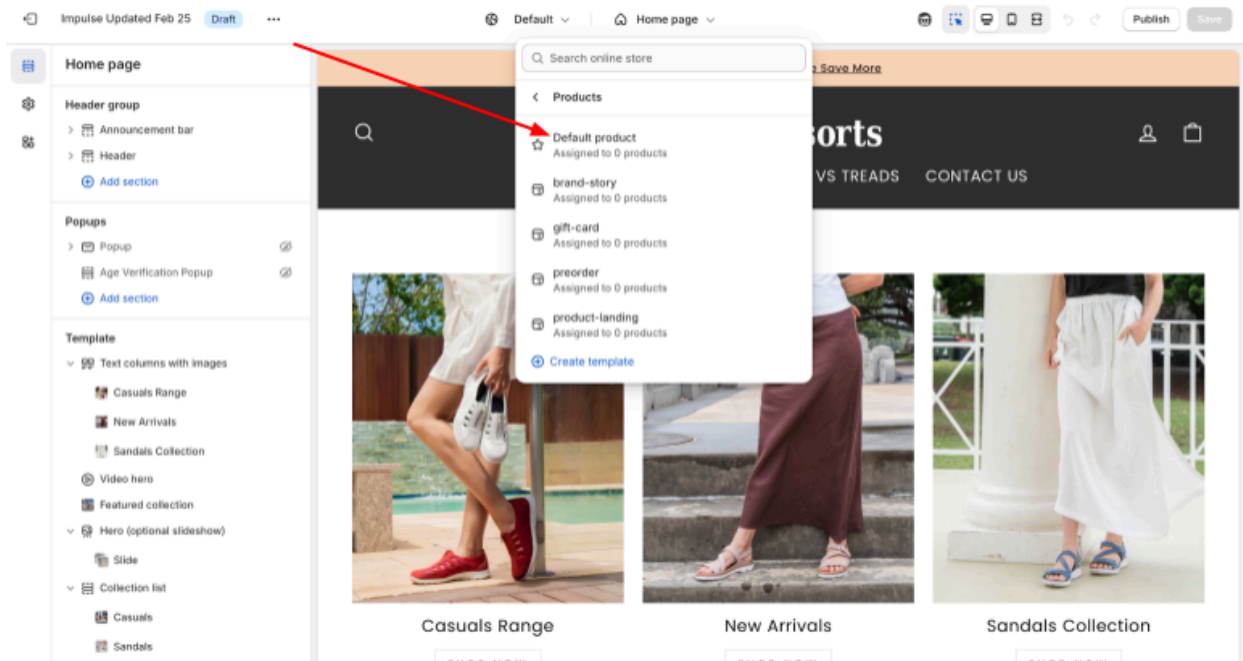

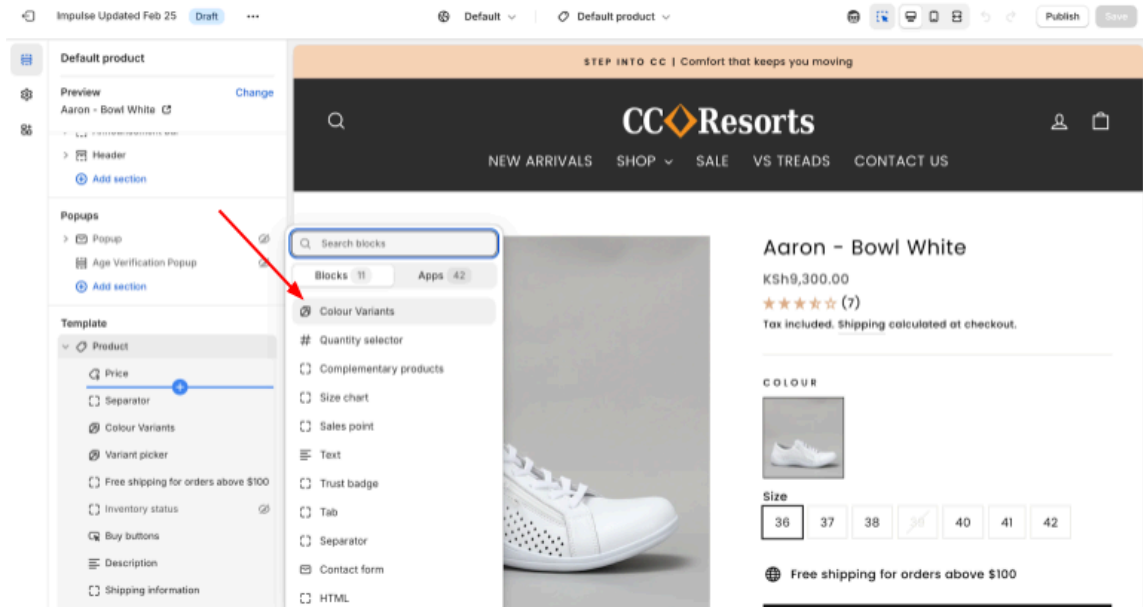

Colour Variants

1. **Log in** to your Shopify store.
2. In the **admin panel**, go to **Online Store** > **Themes**.
3. Locate your **current theme** and click **Customize**.
4. Open the **Homepage** dropdown and select **Products**.

5. Choose the **product template** to edit.

6. In the **Template** section, click **Add Block** and select **Colour Variant Block**.

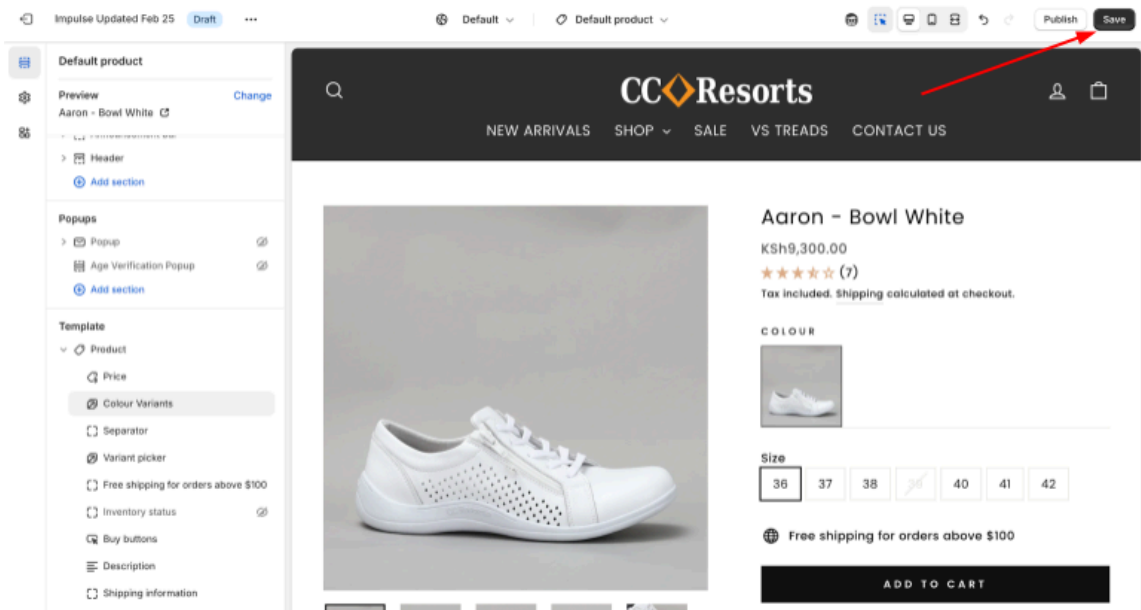

7. Click the block to add the **label**.

8. Then customize the **block** as you need.

9. Click **Save** to apply the changes.

Code Changes

Sections

1. sections/main-product.liquid - Added colour variants block settings line 168-180

Snippets

1. snippets/collection-grid-filters-form.liquid - Added metaobjects variable line 9-11
